Dear hiring committee,

This letter is in response to the position of Website Developer at Henry Schein One, LLC. I believe that my experience, education background, skills, and eagerness to learn new skills make me the perfect fit for this position.

I have a bachelor and a master's degree in Computer Science from Jordan and I was working as a private tutor while I'm doing my master's program, I was teaching up to 10 people groups "Algorithms, JavaScript, and my favorite language C#, I finished my masters back in 2016 and then I came to the US; it took my almost a year and a half to get my green card ready.

Recently, I finished a full stack web development coding bootcamp at University of Washington in downtown Seattle, and it was very great experience where I learned new technologies such as "ReactJS", and improve my skills in other technologies like "JavaScript, HTML, CSS, NodeJS, MongoDB, and MYSQL".

I work as an Uber and Lyft driver to support my family, and I keep myself busy by building some fun projects on the side and taking some courses online.

Finally, now I am looking for new opportunity to start my career as Software Developer, and I am sure that Henry Schein One, LLC is one of the best places to start with and learn from.

I look forward to discussing the position with you.

Sincerely,

Amjed Ayoub,
